Hi David,

Here's the site 27 data. I will send another email with revised figure.

Thanks -- Medi

From Treasure Island Navy team - data for stockpile.

Based on conversation, Navy believe the pre-dredge core samples data included STLC #'s all non haz. I will have Medi verify upon her return next week.

Good Afternoon Denise:

Attached is the data table for the TI/Alameda dredging stockpiles: 500cy each. You will see highlighted the three exceedences relative to the Alameda acceptance criteria (attached).

As we discussed, the physical lead shot is causing this and does not seem to be indicative of any new issues. Note that it is not validated data at this point.

Of note is that nothing else really showed up in the analysis.

We're working on a figure to correspond to the table and should have that to you on Tuesday.

Should you need anything else in the meantime, let us know. We are working to get the offending stockpiles out of Alameda as soon as possible.

Thanks for your help on this!

V/R DC
